Project Goal

Insulin

Animal

1920s

14,000 USD/Y

E. coli

1980s

1,000 USD/Y

E. coli

Now

80 USD/Y

Beyond insulin, we aim to build:

a platform that enables more proteins to achieve similarly efficient production.

Principle Instructors and Advisers

Kevin C. Chan

Computational Biology and Artificial Intelligence

Published papers in journals including *Nature*

Yongtao Zhu

Gliding Mobility and T9SS

Published papers in journals including *J Clin Invest*

Days 1-4 | Brainstorming

Reviewed **15** excelling iGEM wikis
Surveyed **23** databases
Generated **64** HP ideas

Days 8-11 | Modeling

Tested **8** candidate models

Selected **1** predictive framework
